Ranked Choice Voting in Minnesota Cities Fact Sheet
Ranked Choice Voting is a proven reform that is easy to use, gives voters more choice and more power, and improves outcomes for both candidates and voters historically underrepresented in the political process.

RCV has been tested in cities and states across the country, and the Minnesota Supreme Court and several federal district courts have found it to be constitutional.

Since 2009, Fairvote Minnesota has been documenting the experience of Minnesota voters using ranked choice ballots; this report contains highlights of that data, including polling, election outcomes, and voter experience. By all measures, RCV has been a resounding success for Minnesota.
Five cities will use RCV in 2021:

- Minneapolis (since 2009)
- St. Paul (since 2011)
- St. Louis Park (since 2019)
- Bloomington (starting 2021)
- Minnetonka (starting 2021)

Minneapolis holds regular municipal elections every four years, while Bloomington, Minnetonka, St. Paul and St. Louis Park hold municipal elections every two years. All five cities will use RCV in 2021 for mayoral and city council elections. Close to one million people live in cities in Minnesota using RCV.

**Highlights**

- **83-92%** of voters find RCV simple to use
- **72-85%** of voters like RCV and want to continue to use it
- **62-72%** of voters want to see RCV expanded to state elections
- **71-90%** of voters say RCV creates more civil campaigns

**What do voters think about RCV?**

- [What Minneapolis voters think about RCV](#)
- [What St. Paul voters think about RCV](#)
The following data is from the most recent polling in the three Minnesota cities using Ranked Choice Voting.

**Ease of Use:**
Voters consistently and overwhelmingly report that RCV is easy to use.
- 92% of St. Louis Park voters in 2019
- 93% voters of color and voters aged 55 and older
- 92% Minneapolis voters in 2017 across all incomes ethnic groups, and ages
- 83% St. Paul voters in 2017 including people of color

**Like RCV:**
Voters like RCV, want to continue using it, and the percentage of voters liking RCV increases over time.
- 79% of St. Louis Park voters in 2019
- 84% of Minneapolis voters in 2017
- 72% of St. Paul voters in 2017

**Familiarity with RCV:**
Vast majorities of voters are educated about and familiar with RCV before going to the polls.
- 83% of St. Louis Park voters in 2019
- 77% of Minneapolis voters in 2017
- 69% of St. Paul voters in 2017

**Expansion of RCV:**
Vast majority of voters in cities using RCV would like to see it expanded to state elections.
- 72% of St. Louis Park voters in 2019
- 70% of Minneapolis voters in 2017
- 62% of St. Paul voters in 2017

**RCV fosters more civil campaigns**
The vast majority of voters report that campaigns are more civil under RCV and that candidates spent no or very little time criticizing each other.
- 71% of St. Louis Park voters in 2019
- 92% of Minneapolis voters in 2017
- 90% of St. Paul voters in 2017

2. 2017 exit poll of Minneapolis voters conducted Edison Research.
3. 2017 exit poll of St. Paul voters conducted by Edison Research.
Election Outcomes: A Stronger Democracy

Voter participation is higher

Election data on voter turnout demonstrates that in addition to the benefit of increasing effective voter participation by eliminating the low-turnout nonpartisan primary (in which only 4-10% of voters participate), turnout in November is trending upward under RCV by fostering more competitive elections with multiple candidates—a key driver of voter turnout.

**Minneapolis in 2017:**
- Voter turnout was 43% the highest for a municipal election in 20 years and a more than 32% increase over 2013, which was the highest turnout in 12 years.

**St. Louis Park in 2019:**
- Voter turnout increased by nearly 50% from 4,436 to 6,619 over 2015, the last similar election.

- Competitive council races decided by second- and third-choice votes saw the highest rates of increased voter turnout in 2017 over 2013:
  - Ward 1: 55% increase
  - Ward 3: 57% increase
  - Ward 4: 38% increase
  - Ward 5: 20% increase
  - Ward 11: 25% increase
St. Paul 2013-2017

- **27%** of 61,984 voters turned out in the 2017 mayoral election, the highest participation in eighteen years.⁴
- Prior to the open mayoral race in 2017, the competitive 2015 Ward 2 city council race turned out **6%** more voters than in 2011, and was the Ward's highest turnout for a municipal election in a decade.
- In the 2013 special election for the Ward 1 city council seat, turnout was **33%**, higher than in 2011, and the Ward's highest turnout for a municipal election in 8 years.

Voters rank their ballots

- **64%** of first-time St. Louis Park voters ranked their ballots in 2019
- **87%** of Minneapolis voters and **76%** of St. Paul voters ranked their ballots in 2017

The large number of voters that rank their ballots demonstrates that very few voters choose to only vote for one candidate. This means that the vast majority of voters feel that they played a role in deciding the winner.

Valid ballot rates demonstrate high voter proficiency

- **99.96%** valid ballot rate in Minneapolis
- **99.99%** valid ballot rate in St. Paul in 2017

RCV elections uphold highest levels of voter integrity and transparency

- City ordinances describe with high degrees of detail, the process of how RCV elections are tabulated, reported, and audited.
- Public election results show the number of votes and reallocation of votes in each round of counting. See each city’s election results: Minneapolis, St. Paul, and St. Louis Park.
- Valid ballot rates are nearly 100% in RCV elections.
- There has not been a single complaint brought against any of the three cities about miscounting or misreporting election results.
- First-round election results are available on election night. In Minneapolis and St. Louis Park (and starting in 2021 in Bloomington and Minnetonka), election results for races that require additional rounds of tabulation are available the next day. St. Paul continues to manually tabulate ballots which is typically completed a few days following the election. RCV tabulation software that would make same day election results available is anticipated this year in Minneapolis.
RCV increases the diversity of candidates running and improves electoral outcomes for women and people of color.

In 2019, St. Paul’s 2017 election had the most demographically diverse slate of mayoral candidates in the city’s history, and voters elected St. Paul’s first African American mayor. In Minneapolis, it helped elect the city’s most diverse city council in history, including an African American councilmember, two transgender people of color and the re-election of the first Somali-American and Latina.

In Minneapolis in 2017, a woman or person of color won in 12 of the 22 races.

In 2013 in Minneapolis, voters elected a gender-balanced city council and the second female mayor in Minneapolis history.

They also elected the first Somali-American, Latina, and Hmong city council candidates in Minneapolis history, resulting in the city’s most diverse city council up to that point.
